

# Fire and Ice

## What is it?

A thrilling evening of extremes. Guests walk through a flaming red entrance, greeted by devilish beings and surrounded by burning lava lamps and fiery entertainment, another few steps takes them into a room as blue as the ocean, where icicles hang from the ceiling and white lighting crashes off of cool, crisp mirrors. This is a land of fire and ice...

## How does it work?

Guests are greeted with a double helping of extravagance, echoing two contrasting worlds. A Fire and Ice evening is completely flexible and can be adapted to suit your audience and budget. We have a massive range of themed items, decorations, entertainers and focal features. Whether you want a low key affair or an all-out mind blowing evening of astonishment, we can create your perfect party.

## Example Evening

Before reaching the venue, guests will walk through a passageway decorated with dazzling twinkle lights hanging in frosted trees, an ice machine creating a magical haze for guests to pass through. Further towards the door, guests travel through a roaring inferno created by flame burners and red up lighters. Once in the main venue, the party will be split into two areas. The ice palace is an ideal place for dinner; a vision of cool ice and serene blue ambience. Guests can be provided with white angel wings, halos, white and blue glow sticks. They could enjoy chilled icy dinks or take a walk on the wild side and drink from the tempting vodka luge.

White and blue creative fluorescent lighting and frosty gobos, white chair covers and table linen alongside frozen twinkly twig table centres with mirror bases, crystal stalactites and icicle table decorations will also ensure the room appears a pristine, untouched vision of ice.

Wandering into the fire room, guests can adorn themselves with red devil masks, horns and crimson feather boas. Intelligent lighting projecting flames on the walls alongside more red or orange up lighters and lava lamps will produce a heated atmosphere. Red organza drape material will cascade down walls to frame guests relaxing on red chaises lounges decorated with red cushions and throws.

Guests will be able to enjoy fiery red cocktails whilst admiring red roses placed in fiery vases. A DJ could play, and the dancefloor could come alive with red laser effects, adding to the flaming atmosphere.

Your Fire and Ice evening can be as opulent as you want it to be: speak to us to design a party to remember.

# Fire and Ice

## Who is it suitable for?

- Colleagues and clients
- All ages, genders and business backgrounds
