

# Motorised Madness

## What are they?

A bucket-load of adrenaline-fuelled activities to form the basis of, or enhance any event.

The supreme energiser or incentive day; guests get to experience activities that would knock the socks off a sumo wrestler! Whether it's taking control of a Land Rover blindfolded or hurtling round a bend in a 400cc buggy, everybody's primal need for speed and excitement can be catered for during a Motorised Madness day.

## How do they work?

Guests are split into teams and rotate around various activity zones, with fun money or points able to be awarded depending on team performance in each zone.

Our expert instructors will introduce guests to each activity, and after a short demonstration or briefing it will be the guests' turn to have a go! Create the ultimate action experience. The activity range is vast, allowing you to pick and mix activity zones according to your audience and requirements.

## The Choice of Action

### Argos

Guests can speed easily across unforgiving landscapes in Argo cats. These 6 wheeled semi amphibious machines are used as reconnaissance vehicles by the Canadian army. Able to cross any off road terrain, they demand a high level of co-ordination and control.

### Blind Driving

Highly dangerous on the M25, but safe in the middle of a field. Team members take it in turn to "navigate" one of their colleagues, who will be driving a 4x4 vehicle blindfolded, around a course. Effective at building communication and trust between colleagues.

### Finesse Driving

It's fair enough being able to race around at full speed, but that's no good if you lack sufficient driving skills: With this activity teams can hone their handling capabilities. Using a 4x4 vehicle, various finesse driving tasks can be undertaken to gain points – including dribbling a giant ball around an obstacle course.

### Hovers

If ever you've dreamed of gliding through the air with the greatest of ease, these are for you. Hovers are single seater mini-hovercraft, able to travel over both land and water. By creating a thin cushion of air directly underneath the vehicle, Hovers allow drivers to travel at speed and steer through a specially designed course by moving their weight from side to side and using a rudder.

# Motorised Madness

## **Pilots**

With 400cc engines, these dune buggies are capable of reaching great speeds. Easy to drive due to their simple hand control system, Pilots can provide a mountain of rapid excitement with their ability to jump and corner briskly. Brush up on some driving skills, race against the clock with team mates, or simply rocket around an outdoor circuit!

## **Powerturns**

Capable of spinning 360° on its own axis, the Powerturn is a dual seater buggy powered by twin engines. A totally different driving discipline, they can power slide around corners, perform doughnuts, wheelies and can probably be manoeuvred faster than any other off road leisure vehicle in the world. Tackle a demanding off road course in them, or take part in a spot of Powerturn Snooker; attempting to hit large coloured balls in a certain order and in the quickest time.

## **Quads**

Exciting off road four wheeled motorbikes. Quads are simple to use and can be driven on almost any terrain. Teams are able to be scored on their performance along a Quad trail. Or why not have teams test their handling abilities to the limit with a Quad obstacle course?

## **Rage Buggies**

As the name suggests, these machines weren't built for Sunday driving. Taking control of either a single or 2 seater buggy, team members can use the 614cc engine to navigate around a circuit at considerable speed!!

## **Rally Karts**

With great cornering abilities and acceleration that makes Usain Bolt look like an OAP, these traditional Go-Kart vehicles provide good old fashioned speed based excitement. The Rally Kart's model and tyre type mean they can be driven easily on grass and other off road surfaces, and can be used to race against the clock.

## **Reverse Steer Crazy Tractors**

More vehicular based insanity! Using motorised seated lawn mowers, team members attempt to complete a marked out course. Easy? Far from it – these machines are built to bamboozle. With the Crazy Tractors steering in the opposite direction, teams will find themselves in a challenging and truly comical predicament!

# Motorised Madness

## Who is it suitable for?

- All genders, organisations and business backgrounds
- Colleagues or clients
- Most effective for 40 or more people

## Who are the benefits and outcomes

- An exciting way for guests to meet
- A memorable and fun occasion
- A great way of rewarding hard working colleagues
- A perfect, energising incentive

## Timing and Logistics:

<b>Number of people</b>	Unlimited
<b>Duration</b>	Dependent on activity chosen
<b>Venue / Logistics</b>	Any suitable venue or setting
<b>What we supply</b>	Instructors and all necessary equipment and safety gear for each activity. Pre event planning and on site management.
<b>Pricing</b>	Price on application
<b>Health and safety</b>	Risk Assessed, £10million Public & Product Liability and Professional Indemnity Insurance

## Enhancements

- Make your day eclectic by adding in activities from our Country Pursuits Mix: For some slightly more relaxed enjoyment, try a spot of archery, clay pigeon shooting or axe throwing in between the motorised madness!
- Complement a Multi Action Day with a variety of collaborative tasks from our Mix and Match Teamwork Challenge selection
- We can provide prizes themed to each activity
- Round the event off with an action themed evening dinner; during which prizes and accolades can be awarded for the various performances of the day.
